Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to optical switching apparatus and method including multiplexing and demultiplexing, classified in class 398, subclass 48.
- II. Claims 11-17, drawn to an optical communication system including unequipped ("keep-alive") signal generation, and a method for generating the unequipped signal, classified in class 370, subclass 522.
- III. Claims 18-20, drawn to a method for determining network topology, classified in class 370, subclass 254.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, invention I involves injecting and extracting data from optical switches. The data is not limited to the keep-alive signals covered by invention II, or to IDs of various ports in optical switches as covered by invention III. The keep-alive signal generation method and apparatus of invention II is usable independently of the particular switching arrangement covered by invention I and does not require a determination of network topology as covered by invention III. Finally, the method for network topology discovery set forth in invention III does not require the specific switching arrangement of invention I or provisions for keep-alive signal generation as defined by invention II.

Art Unit: 2874

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
